Aspire architecture

Aspire Architecture

Click the different modules of Aspire Architecture below to access the detailed introduction.
Click little arrows at the bottom right of some modules to download the corresponding src/binaire files.

Some of the modules bind a set of contributions from different partners, downloads are available in the introduction pages of the related modules.

Main access

The AspireRFID trunk source code is available on the [forge SVN](#). Having an SVN client you can get the source with the following command:

```
svn checkout svn://svn.forge.objectweb.org/svnroot/aspire/trunk
```

The documentation for the AspireRFID trunk can be found below or at the menu on the right:
